FOR IMMEDIATE RELEASE
December 21, 2017

Sagamore Parkway to open all four lanes of traffic

LAFAYETTE, INDIANA – December 21, 2017 – The City of Lafayette is proud to announce that a major milestone has been reached on the Restore Sagamore project. The third and final phase of Restore Sagamore is now open to all four lanes of traffic on Sagamore Parkway. Drivers are encouraged to be aware that the 30 MPH work zone speed limit will remain in effect through portions of the road and there will be no double left turns at the intersection of Sagamore Parkway and South Street. Intermittent lane closures will occur during the next week for crews to install vehicle detection equipment at the traffic signals, and throughout the winter season to finish work on the installation of light poles and rain gardens in the medians. The 2018 construction season will be devoted primarily to reconstruction of the South Street approaches and other finishing touches along Sagamore Parkway.

The Restore Sagamore project is currently on track to finish as projected in mid-summer of 2018.
